Career Objective

Final year Computer Science Engineering student with hands-on experience in Generative AI, Python, FastAPI, and AI powered application development through internships and projects. Skilled in building LLM based applications, integrating OpenAI APIs, implementing RAG pipelines, and developing secure backend services. Seeking an entry level GenAI/AI Engineer role to build intelligent, production ready AI solutions.

Education

Chandigarh University, Punjab, India

July 2022 - June 2026

- BE-CSE, CGPA: 8.03

Lilawati Vidya Mandir Sr. Sec. School, Delhi, India

April 2021 - March 2022

- CBSE (Class XII), Aggregate: 88

Lilawati Vidya Mandir Sr. Sec. School, Delhi, India

April 2019 - March 2020

- CBSE (Class X), Aggregate: 87.4

Technical Skills

Languages: Java, Python, C++, SQL

Frameworks: FastAPI, React.js, Node.js, Express.js

Database: MongoDB, Supabase

AI/Gen AI: Large Language Models (LLMs), OpenAI APIs, LangChain, Retrieval Augmented Generation (RAG), Prompt Engineering, Embeddings, Vector Search, Prompt Injection Mitigation, FAISS, Structured Outputs

Tools: Git, Socket.io, REST APIs

Experience

HCLTech - Intern (Solutioning)

January 2026 - May 2026

- Designed prompt engineering strategies to generate structured outputs from LLMs.
- Integrated OpenAI APIs for text generation, embeddings, and AI-powered backend workflows.
- Developed reusable JSON prompting techniques for reliable model responses.

Projects

Mentra AI - AI Tutor and Student Support System

[Live](#) | [Github](#)

- Built an AI powered tutoring platform using FastAPI, React, OpenAI APIs, and LangChain.
- Implemented Retrieval-Augmented Generation (RAG) with FAISS based semantic search for context aware responses.
- Developed REST APIs for quiz generation, answer evaluation, authentication, and user management.
- Designed structured prompts and prompt injection safeguards to improve response reliability and security.

TaskFlow - Team Task Management System

[Live](#) | [Github](#)

- Developed a full stack Team Task Management System using FastAPI, React, and SQLAlchemy.
- Implemented JWT authentication, RBAC, project-level permissions, and secure REST APIs.
- Built task assignment, team collaboration, and progress tracking features with scalable backend architecture.

Chatify - Real Time Chat Application

[Live](#) | [Github](#)

- Built a real-time chat application using MERN and Socket.IO supporting instant messaging and chat rooms.
- Implemented JWT authentication, CRUD messaging APIs, and persistent chat storage using MongoDB.
- Designed scalable backend APIs and WebSocket communication for low-latency messaging.
